

OceanLED[®]

SUPERYACHT DIVISION

OceanLED Quality

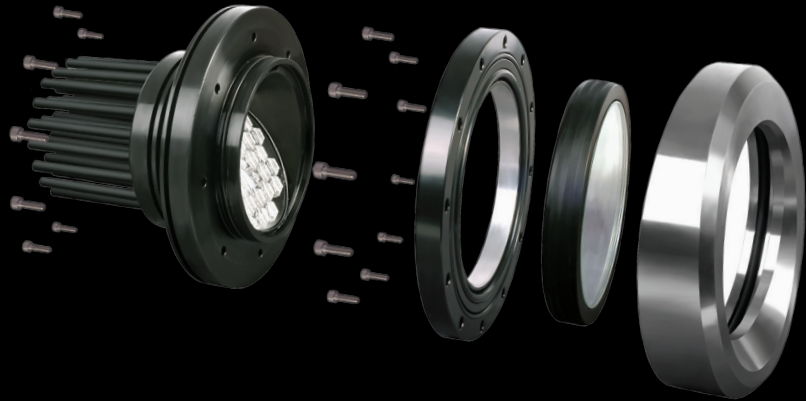

With our heritage in marine lighting, we understand what the harsh marine environments demand of our products in terms of performance and quality. OceanLED products are purpose built from marine-grade components and are over-engineered to resist vibration, electrical spikes, humidity, and everything else the marine environment can deliver.

Immediate benefits

- no start-up power surge
- instant on/off without waiting
- reduced power consumption
- low heat
- no bulbs or mercury
- minimal maintenance
- consistent/unlimited colour options

Advanced LED features

- panic mode strobe feature
- dimming capabilities
- unlimited, 4-channel RGBW High Definition LEDs. Controlled via DMX-512 through the vessels on-board systems, or wirelessly via devices such as an iPad, iPhone or Android. Our advanced colour technology allows you to pre-program more than 40 static and dynamic colour scenes to set the mood, enhance an on-board event or even change colour with the time of day.

Bespoke to you

OceanLED have dedicated in-house engineering, sales and customer service teams ready to support your project. With our full CAD CAM facilities, we will follow your project every step of the way, from inception to launch. We can tailor all aspects of your requirements ensuring the best possible solution and visual effect.

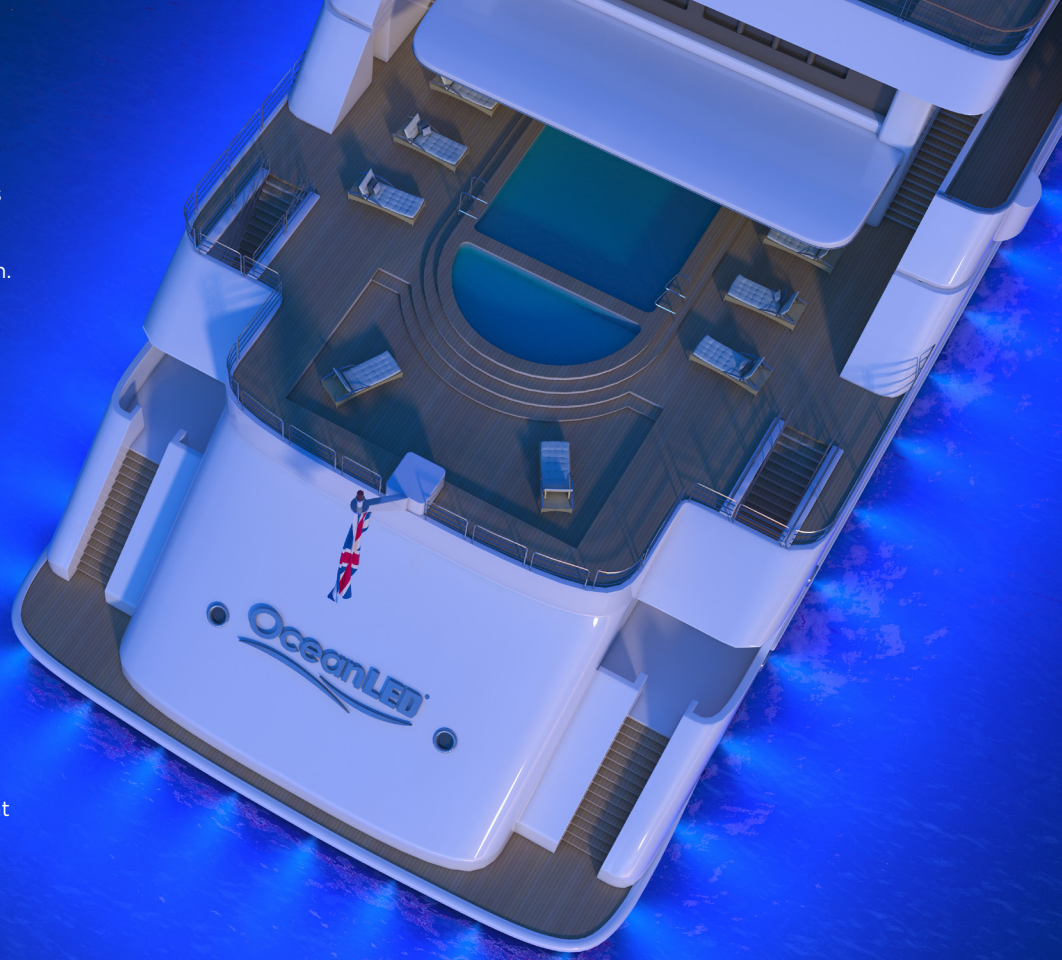

Personalised Service

In our experience, each underwater lighting requirement is different. Whether a new build or a refit, our custom projects team will advise on each technical aspect of the design to get the optimum lighting effect for your yacht.

We work closely with all departments throughout the build or refit process making sure your lights are delivered on time and to the correct specification; keeping you informed every step of the way.

Our Clients

OceanLED works with the most prestigious projects and yards the world over. Due to client confidentiality a vast number of our projects cannot be disclosed and due to the nature of the superyacht industry we have chosen to take a blackout policy of non-disclosure for all our clients.

LED Refit Conversion

Retrofitting to LED from Xenon or HID technology can be extremely complex. OceanLED has both the experience and the products to deliver great quality services which are simple and quick to exchange out and gives you the choice of colours. Whether your yacht is aluminium, steel or GRP, we have a solution which will cater for a quick and easy refit; giving you a significantly improved lighting effect.

New Build

Knowing the challenges of a new yacht build, OceanLED are here to ensure every detail is addressed and full integration of underwater lighting into the yacht's systems. Our project managers will work closely with you making sure the lights and their components are delivered when you need them; fitting neatly into your build program.

Commissioning Service

OceanLED underwater lights are built to last, but for added personal service and peace of mind, we offer to commission* your OceanLED lighting system ensuring the installation and system is working correctly and to our satisfaction before giving you an extra third year on your warranty.

*OceanLED commissioning service is subject to a fixed fee plus expenses; please contact OceanLED or your distributor for more information.
